Internal Hackathon@ ABESIT for Smart India Hackathon 2024

This event has been made up of several sorts of issue statements supplied by various ministries. Smart India Hackathon is an across the state programme that gives students a platform to tackle some of the most important challenges we encounter in our everyday lives, instilling a culture of product creation and a problem-solving attitude. The primary goal of this internal hackathon is to pick the final team (25 + 05 Waiting submissions) for participation in the SMART INDIA HACKATHON-2024, and these nominated teams will be enrolled on the SIH site till September 12th. As a result, we would like to enlist your vast experience in a variety of sectors. I think your advice will help us make better decisions and broaden our perspectives in this area. Our committee will be appreciative for your thoughtful gift and advice.
